

PROBABILITY WITHOUT CALCULATION

Peter Winkler

**Professor of Mathematics
and Computer Science**

Dartmouth College

Thursday, April 27, 5 PM

101 Jordan Hall

The tools of probability theory are so powerful that many problems can be solved without pencil and paper—or computer. The theory is when you figure out how to solve a problem “in your head,” you can better understand why the answer is what it is. We’ll examine some intriguing probability puzzles together to see if we can solve them by pure reasoning.
