Graduate Student Seminar

Department of Mathematics

Join us for a panel on non-academic jobs

Date: Monday, Nov. 1 2021

Time: 4:00 pm

Location: 258 Hurley Bldg

Zoom Link: notredame.zoom.us/j/95815357423

This seminar will be a panel discussion featuring four Notre Dame PhD's in mathematics who are currently working in a job outside of academia, or in academia but not as a math professor. The purpose of this panel discussion is to give current Notre Dame students and other interested parties a better idea of career options after getting a math PhD outside of academia. Each panelist will discuss their own career path and useful skills to develop for getting a job outside of academia. We hope this will be the first of several panel discussions, and that the panelists and others can serve as useful resources for Notre Dame math students interested in working outside of academia.

Panelists:

- **Ben Jones (Notre Dame PhD, 2007, Senior Applied Scientist at Amazon Web Services, Portland)**
- **Katie Meixner (Notre Dame PhD, 2013, Data Scientist at Johns Hopkins Applied Physics Lab)**
- **Danny Orton (Notre Dame PhD, 2019, Physicist at Peraton in Colorado Springs)**
- **Jeremy Mann (Notre Dame PhD, 2020, Senior Data Scientist at Concert AI, Oakland, CA)**
