

John A. Lynch Lecture Series

THE YAMABE PROBLEM

4 pm Wednesday, Oct. 7
129 Hayes-Healy Center

Andrea Malchiodi, Ph.D.
Professor of Mathematics
Scuola Normale Superiore
Pisa, Italy

This talk will examine past breakthroughs and surprising new ones in the Yamabe Problem, a paradigm for geometric partial differential equations with lack of compactness. Dr. Malchiodi will discuss current perspectives on the subject and some unresolved questions around it.
