

MATH FOR EVERYONE

TALKS AND DISCUSSIONS ESPECIALLY FOR UNDERGRADS

THE ART OF MATH

Math is a science; which scares many people, yet math is everywhere around you and is more than just numbers. Knowing math is knowing how to think creatively. Succeeding in the world is learning to analyze situations and apply creative solutions. Learning math will help you solve the problems of the world of most any form. Knowing how to apply math in the world is an Art. Math is the foundation of creation in so many disciplines, especially in games. Come learn how math describes the world around you; and makes things fun.
